OREZONE

STRATEGIC EXPANSION INTO CANADA

Acquisition of Casa Berardi Mine

Corporate Presentation | January 2026

All dollar amounts are in USD unless otherwise indicated

Important Notices and Disclaimer

Investor Presentation

This investor presentation is dated January 26, 2026, and has been prepared by Orezone Gold Corporation (“Orezone” or the “Company”) based on information available to it at the time of preparing this presentation. This presentation has been prepared in relation to Orezone's acquisition of all of the outstanding and issued common shares in Quebec Inc. (“ Quebec”) (the “Transaction”). No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of the Company, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation does not purport to contain all the information that investors may require to make an informed assessment of the Transaction and its effect on the Company.

Summary Information

By reviewing or retaining these materials, or attending or participating in this presentation, you acknowledge and represent that you have read, understood and accepted the terms of this “Important Notices and Disclaimer”. This presentation contains summary information about the Company and its activities current only at the date of this presentation, as well as certain information about the Company assuming completion of the Transaction. This presentation is for information purposes only. The information in the presentation is of a general nature only and does not purport to be complete. This presentation should be read in conjunction with Orezone's periodic and continuous disclosure announcements filed with the Australian Securities Exchange (the “ASX”) which are available at www.asx.com.au, filed with SEDAR+ which are available on www.sedarplus.ca and on Orezone's website at www.orezone.com. Certain information in this presentation may have been obtained from research, surveys or studies conducted by third parties, including industry or general publications. Neither the Company nor its representatives have independently verified any such information sourced from third parties or industry or general publications.

Forward-looking Statements

These materials prepared by the Company include forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward-looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. Forward-looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, receipt of necessary regulatory approvals of the Transaction, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. Forward looking statements are based on the Company's and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or its management or beyond the Company's control. Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward-looking statements. Forward-looking statements in this presentation speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances.

Historical Information

Information about the past performance of the Company contained in this presentation is given for illustrative purposes only and cannot be relied upon as an indicator of (and provides no guidance as to) future performance, including future share price performance of the Company. Any such historical information is not represented as being, and is not, indicative of the Company's view on its future financial condition and/or performance.

Important Notices and Disclaimer

Not an Offer

This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever. This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States or any other jurisdiction. Any securities described in this presentation have not been, and will not be, registered under the US Securities Act of 1933 and may not be offered or sold in the United States except in transactions registered under the US Securities Act or exempt from, or not subject to, the registration of the US Securities Act and applicable US state securities laws.

Not Investment Advice

As noted above, an investment in securities in the Company is subject to investment and other known and unknown risks, some of which are beyond the control of the Company. The Company does not guarantee any particular rate of return or the performance of the Company, nor does it guarantee the repayment of capital from the Company or any particular tax treatment. Prospective investors should have regard to the risks outlined in the Prospectus when making their investment decision and should make their own enquires and investigations regarding all information in this presentation, including but not limited to the assumptions, uncertainties and contingencies which may affect future operations of the Company and the impact that different future outcomes may have on the Company. These risks, together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of securities in the Company in the future. There is no guarantee that the Company's securities will make a return on the capital invested, that dividends will be paid on the Company's securities or that there will be an increase in the value of the Company's securities in the future. Accordingly, an investment in the Company should be considered highly speculative and potential investors should consult their professional advisers before deciding whether to subscribe for the Company's securities.

Investment Advice

This presentation does not constitute in any way an offer or invitation to subscribe for securities in Orezone pursuant to the *Corporations Act 2001* (Cth) and has not been lodged with the Australian Securities and Investment Commission. This presentation does not constitute investment advice and has been prepared by the Company without taking into account the recipient's investment objectives, financial circumstances or particular needs. Each recipient must make his/her own independent assessment and investigation of the Company and its business and assets when deciding if an investment is appropriate and should not rely on any statement or the adequacy and accuracy of any information. This presentation is in summary form and does not purpose to be exhaustive. This presentation should be read in conjunction with the Company's periodic and continuous disclosure announcements lodged with the Australian Securities Exchange, which are available to download at www.asx.com.au, and lodged with SEDAR+ which are available on www.sedarplus.ca. The Company makes no representation or warranty (either expressed or implied) as to the accuracy, reliability or completeness of the information in this presentation. The Company and its directors, employees, agents and consultants shall have no liability (including liability to any person by reason of negligence or negligent misstatement) for any statements, opinions, information or matters (express or implied) arising out of, contained in or derived from, or for any omissions from the presentation, except liability under statute that cannot be excluded.

Effect of Rounding

A number of figures, amounts, percentages, estimates and calculations of value in this presentation are subject to the effect of rounding. The actual calculation of these figures may differ from the figures set out in this presentation.

Transaction Consideration

No funds raised under the ASX Prospectus (defined on slide 4) will be used to fund the acquisition.

Important Notices and Disclaimer

Mineral Resources and Mineral Reserves – NI 43-101 (Canada / TSX)

The estimation of mineral resources is inherently uncertain and involves subjective judgments about many relevant factors. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The accuracy of any such estimates is a function of the quantity and quality of available data, and of the assumptions made and judgments used in engineering and geological interpretation, which may prove to be unreliable and depend, to a certain extent, upon the analysis of drilling results and statistical inferences that may ultimately prove to be inaccurate. Mineral resource estimates may require re-estimation based on, among other things: fluctuations in the price of gold; results of drilling; results of metallurgical testing, process and other studies; changes to proposed mine plans; the evaluation of mine plans subsequent to the date of any estimates; and the possible failure to receive required permits, approvals and licenses. Mineral Resource estimates do not account for mineability, selectivity, mining loss and dilution. These Mineral Resource estimates include inferred Mineral Resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is also no certainty that these inferred Mineral Resources will be converted to measured and indicated categories through further drilling, or into Mineral Reserves, once economic considerations are applied.

Ore Reserves and Mineral Resources – JORC CODE (Australia / ASX)

The information in this presentation that relates to the Ore Reserves and Mineral Resources of Orezone has been extracted from the Company's Prospectus dated July 11, 2025 (the "**ASX Prospectus"**) and available at www.asx.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX Prospectus, and that all material assumptions and technical parameters underpinning the estimates in the ASX Prospectus continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the ASX Prospectus. The information in this presentation that relates to the Mineral Reserves and Mineral Resources of Casa Berardi is derived from the technical report entitled NI 43-101 Technical Report on the Casa Berardi Mine, Northwestern Quebec, Canada, dated March 28, 2024, with an effective date of December 31, 2023 (the "**Casa Berardi Technical Report**")

Foreign Estimates and Competent Person – ASX Listing Rule 5.12

For the purposes of Listing Rule 5.12, the Company cautions that the Casa Berardi gold mine Mineral Reserves and Mineral Resources are not reported in accordance with the 2012 Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves (**JORC Code**). The Casa Berardi gold mine Mineral Reserves and Mineral Resource estimates are foreign estimates prepared in accordance with Canadian National Instrument 43-101. A competent person has not done sufficient work to classify the foreign estimate as a Mineral Resource in accordance with the JORC Code, and it is uncertain whether further evaluation and exploration will result in an estimate reportable under the JORC Code. Please refer to Annexure B of this Presentation for additional technical information relating to the foreign estimate. The information in this presentation provided under Listing Rules 5.12.2 to 5.12.7 that relates to the Casa Berardi gold mine foreign estimate is based on information compiled by Michael S. Lindholm. Mr. Lindholm is a member of the American Institute of Professional Geologists (AIPG) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person, as defined in the JORC Code. Mr. Lindholm is a full-time employee of RESPEC Company LLC. Mr. Lindholm consents to the inclusion in this presentation of the matters based on this information in the form and context in which they appear.

Qualified Persons

Rob Henderson, P. Eng., VP Technical Services, Orezone has reviewed and approved the scientific and technical information contained in this presentation other than the scientific and technical information derived from the Casa Berardi Technical Report. Mr. Henderson is a "Qualified Person" under NI 43-101 Standards of Disclosure for Mineral Projects ("**NI 43-101**") and is not independent of Orezone within the meaning of NI 43-101.

Mr. Michael S Lindholm, C.P.G., RESPEC Company LLC, has reviewed and approved the scientific and technical information contained in this presentation that is derived from the Casa Berardi Technical Report. Mr. Lindholm is a "Qualified" Person" under NI 43-101 and is independent of Orezone and within the meaning of NI 43-101.

ACQUISITION HIGHLIGHTS

Positions Orezone as a Diversified Multi-Asset Producer

Orezone to Acquire Casa Berardi Mine

- Acquisition of the Quebec-based mine from Hecla Mining
- Transaction includes a portfolio of exploration projects

Purchase Price

US$272M

Upfront Cash and Equity Consideration

US$80M
Deferred Payments

+

Up to **US$241M**
Contingent Payments

Acquisition Financing

US$100M Franco-Nevada Stream

Transaction Highlights

- Strategic acquisition of an established operating mine, **located in a Tier 1 mining jurisdiction**
- Establishes Orezone as a **diversified multi-asset gold producer,** adding material scale, production and free cash flow
- Casa Berardi's operating history, **well established resource & reserve base, and substantial exploration upside** provide a foundation for future asset growth
- Well aligned with the technical expertise of Orezone's executive and operations team
- **Transaction is accretive** on key operating and financial per share metrics, benefiting all existing shareholders
- Transaction **funded by an attractive financing** and sponsorship from **Franco-Nevada**
- **Value creation potential** through multiple expansion and enhanced capital markets profile, as evidenced by recent market transactions involving non-core Canadian operations[1]

1. Refer to the press releases of Discovery Silver (January 27, 2025), Orla Mining (November 18, 2024) and Fuerte Metals (September 15, 2025) for the "recent market transactions" that are referred to above.

TRANSACTION OVERVIEW

Transaction	• Orezone to acquire Hecla Quebec Inc. (“Hecla Quebec”) a wholly owned subsidiary of Hecla Mining Company (“Hecla Mining”) • Acquired assets include 100% ownership of the operating Casa Berardi gold mine, a portfolio of exploration projects in Quebec including the advanced exploration stage Heva-Hosco

Consideration	• **Upfront Consideration of US$272M**
	  • Initial Cash US$160M
	  • Equity Issuance 9.9% (US$112M)
	• **Deferred Consideration of US$80M**
	  • Cash payments from closing: US$30M at 18-months and US$50M at 30-months
	• **Contingent Consideration of up to US$241M**
	  • Gold price contingent consideration of up to US$10M
	  • Contingent production payments of up to US$231M linked to the permitting and future production from the Casa Berardi WMCP and Principal open pits

Financing	• **US$100M stream financing from Franco-Nevada Corporation (“Franco-Nevada”)**
	  • Five-year fixed delivery of 1,625oz of gold per quarter; thereafter 5% of gold production
	  • Franco-Nevada production payment to Orezone of 20% spot gold price per ounce delivered
	• US$60M from cash on hand

Approvals	• Regulatory approvals (including TSX, ASX and under the *Competition Act* (Canada)) and other customary closing condition
Timing	• Expected to close Q1-2026

CASA BERARDI Location Overview

Location
Quebec, Canada

- Located in Quebec, Canada
- Tier 1 Jurisdiction with assets operated by Agnico Eagle, IAMGOLD, Gold Fields, Alamos and Eldorado

Land Package
>19,500ha

- Property covers 37km of strike along the Casa Berardi Fault
- 19,150ha exploration claims
- 570ha mining leases

Easily
Accessible

- Casa Berardi Mine is located 95km north of La Sarre
- Accessible via paved highway and 38km mine access road
- Employees commute daily to site

Developed
Infrastructure

- Established skilled local workforce
- Paved airstrip 70km from site
- Grid power via 55km 120kV powerline

Regional Operators
IAMGOLD CORPORATION
AGNICO EAGLE
GOLD FIELDS
ALAMOS GOLD INC.
eldorado gold
McEWEN INC.
PAN AMERICAN SILVER

CASA BERARDI Operations Overview

History

- The Casa Berardi mine has produced >3.2Moz of gold over 30-years of operation
- Production over the last 5-years has averaged ~112,000 oz/yr

Resource & Reserves[1]

- 1.3Moz Proven & Probable
- 0.9Moz Measured & Indicated[2]
- 0.5Moz Inferred

Mining

- Mining is currently conducted via underground and open-pit operations
- Current mill feed from the West Mine Underground and the F160 Open Pit

Processing Facility

- Conventional gold circuit
- Jaw Crusher | SAG & Ball Mills | Gravity | CIL
- Capacity of 1.4Mtpa (~3,850tpd)
- Average recovery of 88%

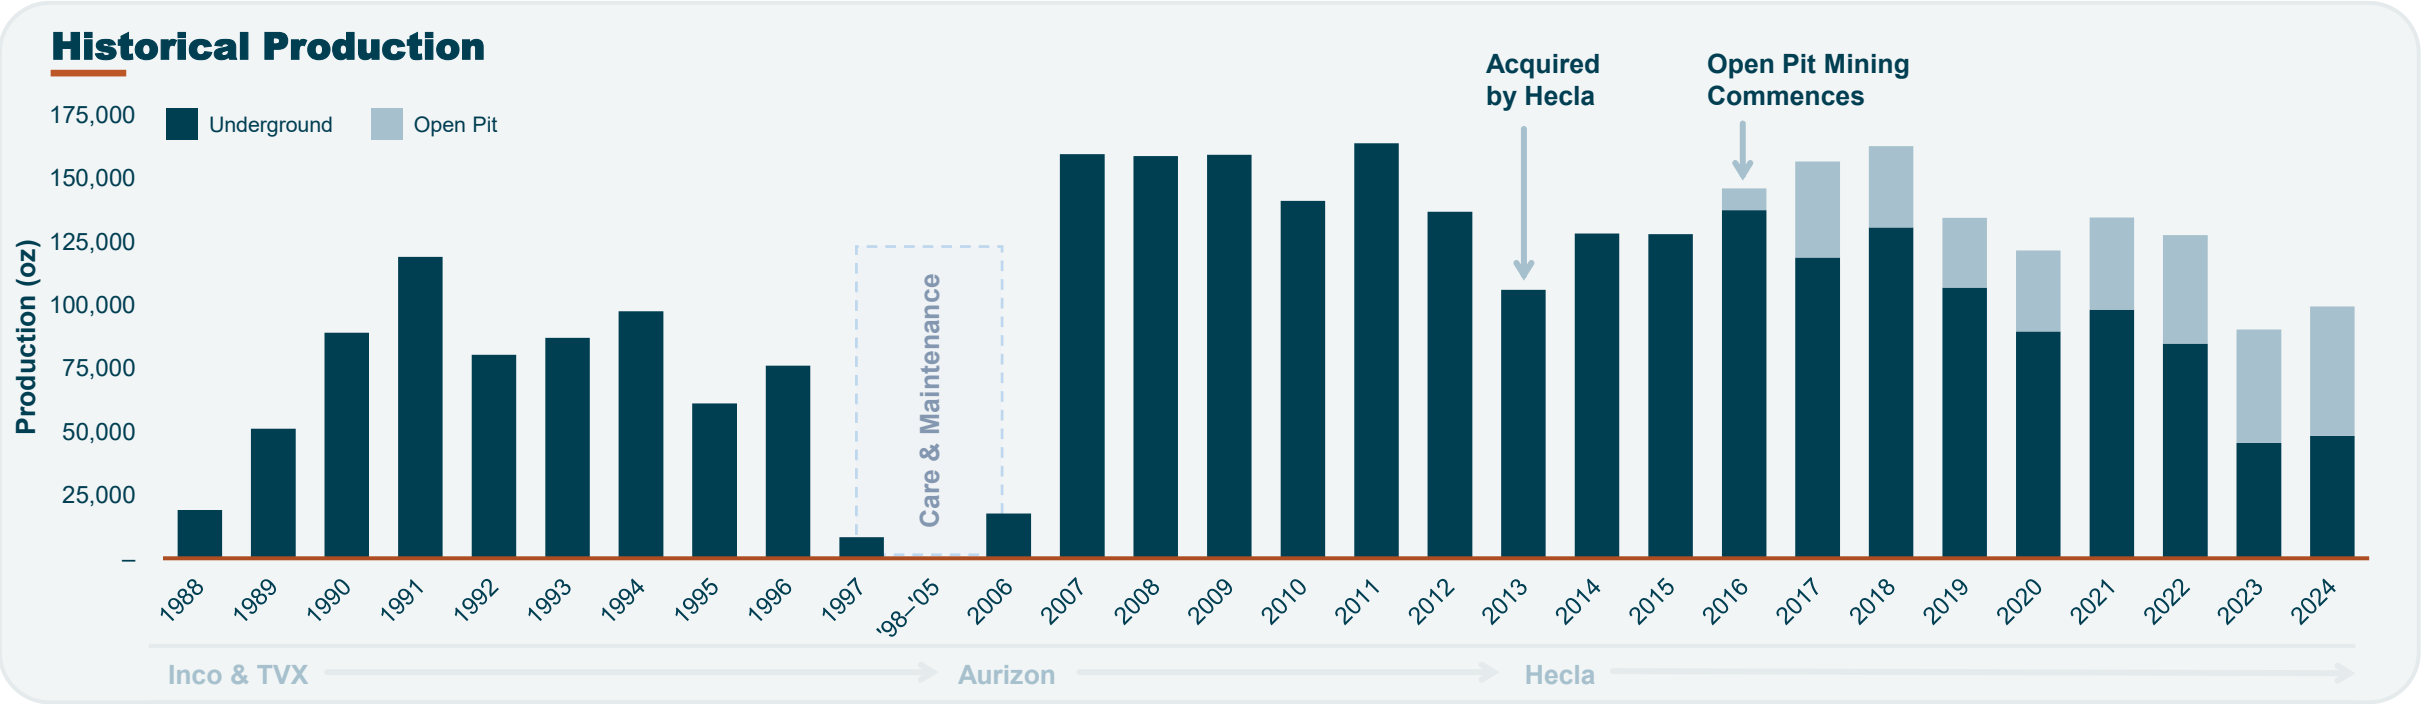

1. December 31, 2024 mineral resource estimate. Refer to the Casa Berard Technical Report for further information
2. Exclusive of mineral reserves
3. Refer to the "Important Notices and Disclaimers" section on slides 2 to 4, and the "Resources and Reserves" section on slide 23 and Annexure B for further information.

CASA BERARDI Operating History

- Through 30 years of production[1], Casa Berardi has predominantly been an underground mine
- 2006 – 2016: Sustained investment in underground exploration and development supported an average production profile of ~141,000oz/yr at a head grade of ~7.00g/t Au[2]
- 2017 – Current: Operations increasingly shifted to open-pit mining, which in recent years has resulted in a reduced focus on underground exploration and development

1. Refer to the "Important Notices and Disclaimers" section on slides 2 to 4, and the "Resources and Reserves" section on slide 23 for further information.
2. Refer to the Casa Berardi Technical Report for further information regarding the operating history of the Casa Berardi mine.

CASA BERARDI Path Forward

RECENT DISCLOSURES **SHIFTING TO OPEN PIT**

- December 31, 2024 reserve gold price assumption of US$1,900/oz
- Open pit mining to end in 2026, with underground operations and stockpile processing to continue to end of 2027
- Recommencement of open pit only operations in 2033 following permitting and development of Principal & WMCP pits (+1.0Moz contained)

OUTLOOK AT **>US$2,500/oz** GOLD PRICE

- Current stated underground M&I resource of 895,000oz grading 6.13/t Au provides significant scope to **maintain and extend ongoing underground operations**
- With sustained investment in underground exploration and development, clear opportunity to **increase head grade and production** to historical levels
- Continue to advance **permitting and development of Principal & WMCP pits**
- With higher gold price evaluate **expansion of current and future open pits**

CASA BERARDI Overview & Exploration Upside

- Near-term underground mine plan underpinned by a substantial resource base and established infrastructure
- Multiple well-defined ore shoots open for extension down plunge
- Actionable exploration upside within Gap Zone and along strike

CASA BERARDI Targeting Higher Grades

- The Casa Berardi deposit hosts multiple plunging zones of significantly higher-grade mineralization (>15g/t)
- Further down plunge delineation of high-grade sub-zones provides the basis to re-establish high-grade stope inventory

CASA BERARDI Deposit Size Comparison

- Underground gold mines in Canada can extend to depths of over 3km
- Casa Berardi has locally been drilled to a depth of just over 1km, and remains open down plunge and along strike

Resources are exclusive of reserves

1. Refer to the "Important Notices and Disclaimers" section on slides 2 and 4, and the "Resources and Reserves" section on slide 23 and Annexure B for further information.

CASA BERARDI Regional Upside

- Camp scale property package covering 37km section of the Casa Berardi Fault
- Limited regional drilling has identified multiple mineralized zones, highlighting broader continuity of the system
- Future systematic exploration centered on uncovering satellite deposits within trucking distance to the Casa Berardi mill

CASA BERARDI Optimization and Value Creation

Near-term Planning

- Focus on near-term mine planning and sequencing - improve grades and tonnage
- Updated life-of-mine plan: multi-year underground LOM and F160 pit extension

Mining

- Open pit grade control and blast monitoring
- Immediate investments in underground equipment and development
- Increase working faces within West Mine, optimizing utilization of hoist and ramp
- Restart East Mine underground, accessed via separate ramp near mill

Processing

- Processing facility automation upgrades
- Mill feed pre-crush to increase overall throughput
- Addition of flash flotation to further improve gold recoveries

Exploration

- Recommence exploration drilling, ramping up to 80,000-100,000m/yr, both surface and underground drilling
- Re-establish a high-grade stope inventory, increasing head grade
- Near-mine targets: multiple down plunge extensions, Gap Zone, and north of Casa Berardi fault
- Regional targets: Lac Germain and multiple mineralized zones along strike

EXPLORATION PORTFOLIO Exploration Properties

Heva-Hosco
Advanced Exploration

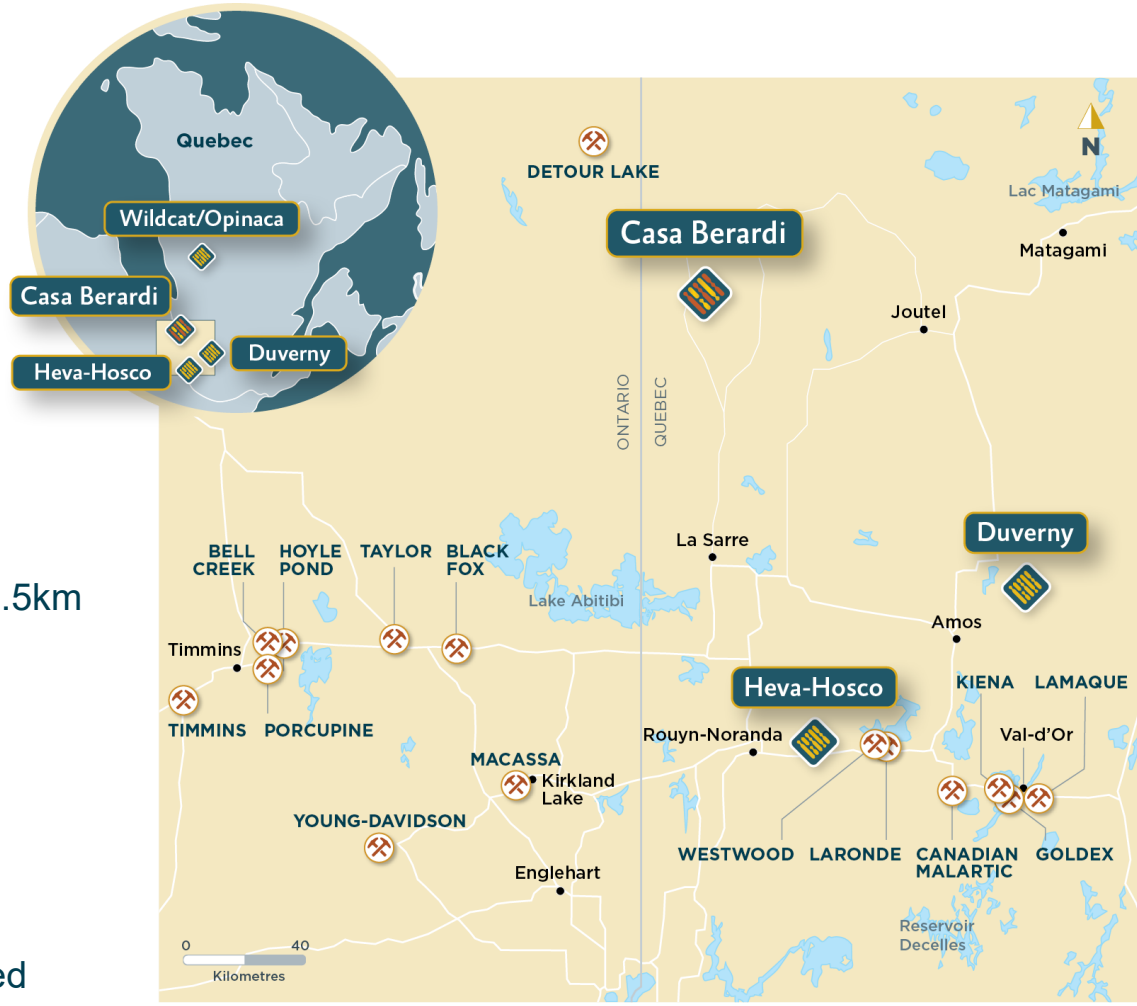

- Located 20km east of Rouyn-Noranda
- 3,850ha property with 8km strike along the prolific Cadillac-Larder Lake Break, which is host to multiple operating mines
- Established 1.2Moz M&I and 0.6Moz Inf. mineral resource[1]
- >400,000m of drilling completed on project
- Mineralization remains open at depth and along strike

Wildcat/Opinaca
Early-Stage Exploration

- Located in the James Bay area
- 24km southeast of the Eléonore Mine, and 5.5km east of Sirios Resources Cheechoo deposit (3Moz global resource)
- Combined property package of 29,500ha

Duverny
Early-Stage Exploration

- Located north of Val-d'Or along the Chicobi break, 3,500ha property
- Prospecting and limited drilling have identified gold and base metal occurrences

1. Refer to Hecla's press release titled "Hecla Reports Exploration Results and Mineral Reserves" dated February 12, 2025 for further information.

OREZONE: A NEW EMERGING MID-TIER PRODUCER

Consolidated Gold Production

- 2026 forecast: 230,000 – 250,000oz[1]
- Medium term target: >350,000oz/yr[2]

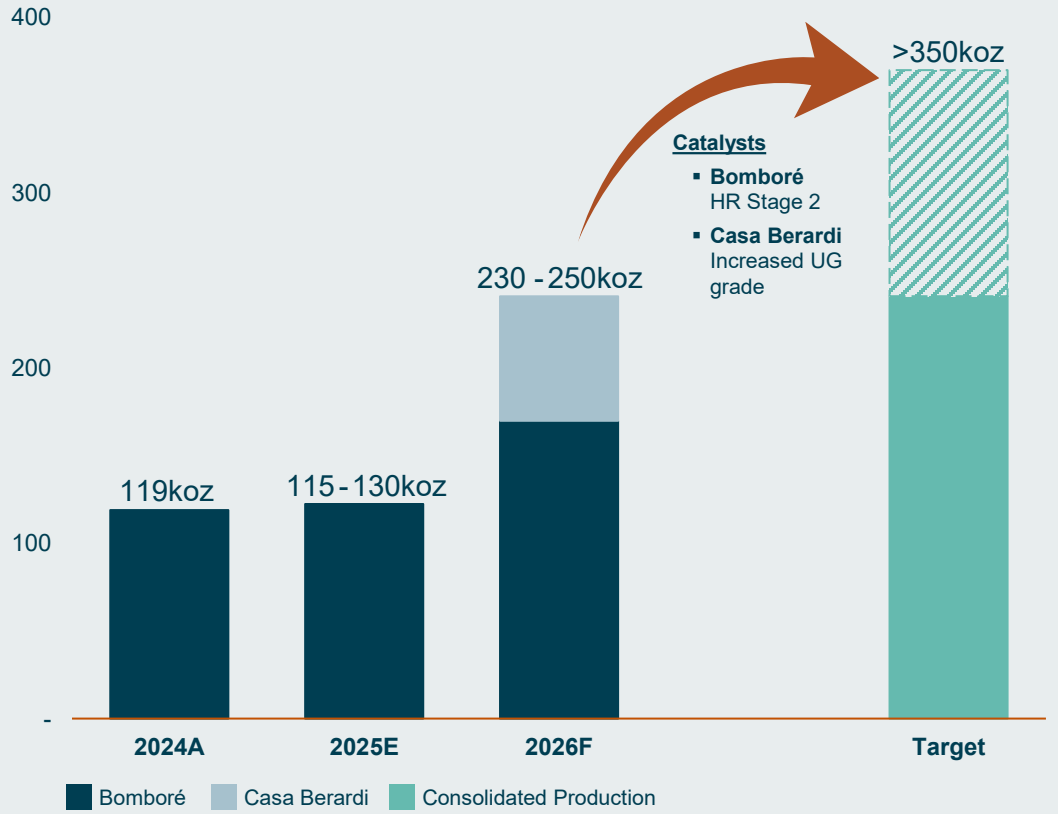

Casa Berardi Mine

- Optimize current operations and develop an updated LOM plan reflecting current gold prices
- Initiate a substantial/sustained exploration program centered on increasing underground head grade and overall production

Bomboré Mine

- Optimize Stage 1 hard rock expansion, which was completed on-time and on-budget in Q4-2025
- Continue to advance Stage 2 hard rock expansion
- Ongoing exploration targeting higher-grade centres of mineralization, further expanding current stated global resource of 5.0Moz

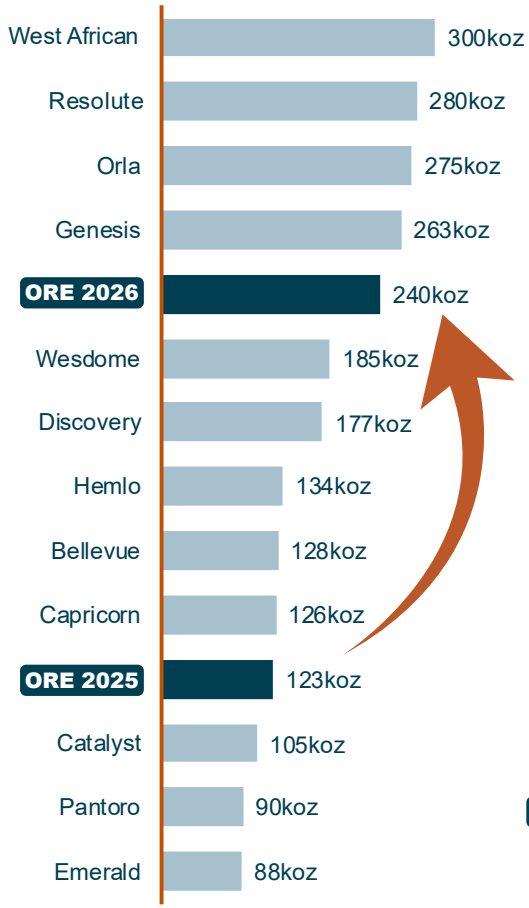

Orezone Production Outlook (100% Basis)

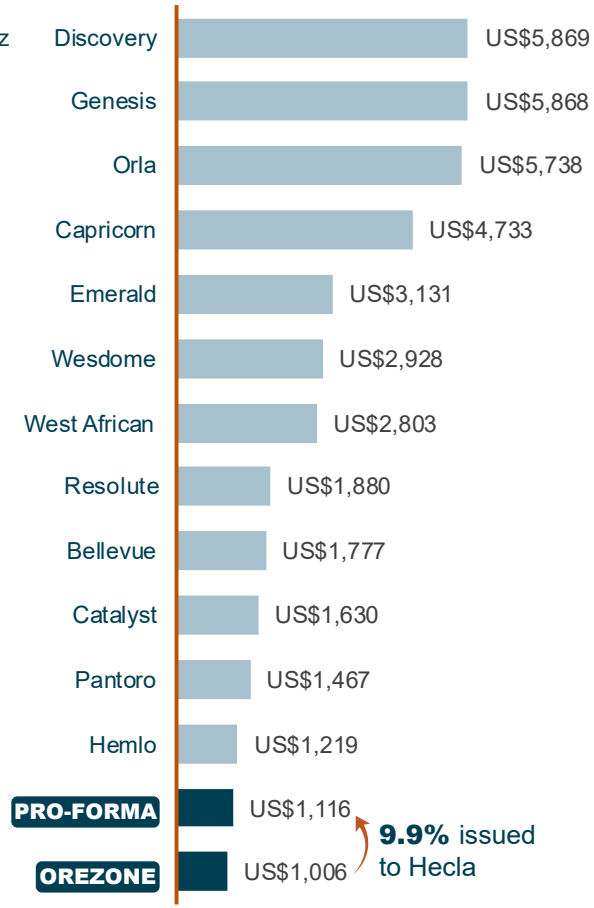

1. Bomboré production forecast of 170,000 – 185,000 oz (see IPO Prospectus). Casa Berardi conservative production forecast based on mid-point of 2025 guidance (see Hecla's press release dated November 5, 2025 and Annexure C for further information).
2. For the purposes of the ASX Listing Rules, the statement of the Company's goal of achieving 350,000oz/yr production is an aspirational statement, and the Company does not yet have reasonable ground to believe the statement can be achieved. Please see Annexure C for ASX (Rule 5.16) production target disclosure.

Questions

CONTINGENT PAYMENT DETAILS

Gold Price Contingent Consideration

- **Up to US$10M linked to gold price in the first 24 months after closing of transaction**
  - US$5M to be paid should gold price average at or above $4,200/oz in the first year following closing of the Transaction; and
  - US$5M to be paid should gold price average at or above $4,200/oz in the second year following closing of the Transaction

Contingent Production Payments

- **Up to US$231M based on permitting and future gold production, open pit or underground, from the Principal and WMCP pit**
  - US$20M on grant of permits: separate cash payments of US$10M upon receipt of permit approvals for each of the Principal and WMCP open pits
  - Up to US$211M through ongoing payments of:
    - US$80/oz for the first 500,000oz of production from the Principal and WMCP pits up to US$40M; and
    - US$180/oz for subsequent production from the Principal and WMCP pits up to US$171M

Foreign Estimate (ASX Listing 5.12) Annexure B

Additional Technical Information Relating to the Foreign Estimate		
Rule	**Explanation**	**Commentary**
5.12.1	The source and date of the historical estimates or foreign estimates.	The Casa Berardi Mine Mineral Resource and Mineral Reserve estimates were prepared under the supervision of Qualified Persons (as defined in the Canadian NI 43-101 Standards). The Canadian NI 43-101 Standard is a national instrument for the Standards of Disclosure for Mineral Projects within Canada. The source of the foreign estimate is the NI 43-101 TECHNICAL REPORT ON THE CASA BERARDI MINE, NORTHWESTERN QUÉBEC, CANADA dated 28 March 2024, with an Effective Date of 31 December 2023. The report was prepared by RESPEC Company LLC (RESPEC) for Mining Company, 6500 North Mineral Drive, Suite 200, Coeur d'Alene, Idaho, USA, 83815. The purpose of the Technical Report was to support the disclosure of the Casa Berardi Mineral Resource and Mineral Reserve estimates as of December 31, 2023. The Technical Report conforms to the Canadian Institute of Mining and Metallurgy and Petroleum (CIM) guidelines and with the Canadian National Instrument 43-101 Standards of Disclosure for Mineral Projects (NI 43-101). RESPEC visited the Property on 19-21 September 2023.
5.12.2	Whether the historical estimates or foreign estimates use categories of mineralisation other than those defined in Appendix 5A (JORC Code) and if so, an explanation of the differences.	The Mineral Resource estimate contains categories of NI 43-101 'Measured', 'Indicated' and 'Inferred', that are consistent with the terminology of the Measured', 'Indicated' and 'Inferred' under the JORC Code 2012. The Mineral Reserve estimate contains categories of NI 43-101 Proven and Probable in the foreign estimate. These classifications are consistent with definitions of Proved and Probable Ore Reserves in the JORC Code 2012.
5.12.3	The relevance and materiality of the historical estimates or foreign estimates to the entity.	The Company considers these foreign estimates to be material to the Company given its intention, through the Transaction, to increase its annual rate of production, increase its Mineral Resources and Reserves and diversify its production sources.
5.12.4	The reliability of historical estimates or foreign estimates, including by reference to any of the criteria in Table 1 of Appendix 5A (JORC Code) which are relevant to understanding the reliability of the historical estimates or foreign estimates.	The foreign estimate is considered to be reliable by Orezone for the following reasons: • Key criteria, as defined in Table 1 of the JORC Code 2012, has been addressed in the comprehensive due diligence completed by Orezone. • Casa Berardi Mine is an operating mine with a long history of successfully producing gold in a highly prospective region in Canada. • The foreign estimate has been reported by Qualified Persons as defined in the Canadian NI 43-101 Standard. • used the estimate to support their annual 2023 Mineral Resource and Mineral Reserve estimate.

Foreign Estimate (ASX Listing 5.12) Annexure B

Additional Technical Information Relating to the Foreign Estimate		
Rule	**Explanation**	**Commentary**
5.12.5	To the extent known, a summary of work programs on which the historical estimates or foreign estimates are based and a summary of the key assumptions, mining and processing parameters and methods used to prepare the historical or foreign estimates	• The Casa Berardi Property is located in the northern part of the Abitibi Subprovince, within the Superior Province of the Archean core of the Canadian Shield. Three principal styles of mineralization have been recognized at Casa Berardi with gold occurring in: 1) quartz veins, 2) stockworks, and 3) banded iron formation. The mineralized zones are closely associated with the Casa Berardi Fault, and the Casa Berardi deposit can be classified as an Archean-age, sedimentary-hosted lode-gold deposit. • Compilation and subsequent verification of the Casa Berardi database has been performed by personnel since 2014. To further evaluate 's database, RESPEC conducted an audit of all 2021, 2022 and 2023 assay data, with acceptable results. RESPEC is satisfied that the drill-hole database is considered to be sufficient for use in geological and mineral domain modeling, Mineral Resource and Mineral Reserve estimation, and mine planning. • Only Measured and Indicated Mineral Resources have been converted to Mineral Reserves. • The Mineral Reserves based on fully-scheduled mine designs, that take into account current production and economic factors such as mining dilution and ore loss, unit mining and processing costs, metallurgical factors and G&A costs. • The mining methods at Casa Berardi are well established with many years of operating experience, providing the necessary expertise to, safely and economically, extract the Mineral Reserves. • The Mineral Resource estimates use a long-term gold price of US$1,750/oz. The reported Mineral Resource estimates are exclusive of Mineral Reserves. • The Underground Mineral Reserves are estimated using a gold price of US$1,850/oz Au and open pit Mineral Reserves are estimated using a gold price of US$1,650/oz Au, using a US$/C$ exchange rate of 1.300. • Underground Mineral Reserves are estimated at a cutoff grade of 3.60g/t Au for 124 Zone and a 3.88g/t Au for the 118 and 123 Zones. • Open pit Mineral Reserves are estimated at a cutoff grade of 1.02g/t Au for the F160 pit and1.18g/t Au for the WMCP, Principal, and F134 Pits. • Test work performed on open pit material was used to estimate gold recovery, while operating data was used for underground material. Extensive test work has been performed by an external laboratory on future open pit material (West Mine Crown Pillar (WMCP) and Principal). • The current process facilities are appropriate for the mineralization material extracted from the mine. The flowsheet, equipment, and infrastructure are expected to support the current LOM plan. • Current permits held by for the Property are sufficient to ensure that the planned surface and underground mining activities which will take place into 2026 are conducted in accordance with the local, provincial, and national regulatory frameworks. • Beyond 2026, the LOM plan includes the development of three additional open pits along with associated waste rock storage facilities and other infrastructure. This planned development may require an EIA to be performed at the Property.

Foreign Estimate (ASX Listing 5.12) Annexure B

Additional Technical Information Relating to the Foreign Estimate		
Rule	**Explanation**	**Commentary**
5.12.6	Any more recent estimates or data relevant to the reported mineralisation available to the entity	As at the date of this announcement, the foreign estimates reported by have not been superseded by any later estimates.
5.12.7	The evaluation and/or exploration work that needs to be completed to verify the historical estimates or foreign estimates as Mineral Resources or Ore Reserves in accordance with ASX Listing Rules Appendix 5A (JORC Code).	Following completion of the Transaction, it is Orezone's intention to undertake an evaluation of the data available to seek to verify the foreign estimate as Mineral Resources or Ore Reserves in accordance with the JORC Code. This evaluation will involve the full verification of all information and applicable modifying factors used in the 31 December 2023 estimation. External consultants will be used as required. Key works proposed to verify the foreign estimate as estimates in accordance with the JORC Code 2012 includes: • Detailed verification and validation of information provided by . • Review of modifying factors used in the Mineral Resource and Mineral Reserve estimates.
5.12.8	The proposed timing of any evaluation and/or exploration work that the entity intends to undertake and a comment on how the entity intends to fund that work.	The evaluation work is planned to be completed during FY2026 and will be reported in Orezone's year end Annual Mineral Resources and Ore Reserves Statement as at 31 December 2026. Funding for this work will be from internal cash flow.
5.12.9	A cautionary statement proximate to, and with equal prominence as, the reported historical estimates or foreign estimates stating that: The estimates are historical estimates or foreign estimates and are not reported in accordance with the JORC Code; A Competent Person has not done sufficient work to classify the historical estimates or foreign estimates as Mineral Resources or Ore Reserves in accordance with the JORC Code; and It is uncertain that following evaluation and/or further exploration work that the historical estimates or foreign estimates will be able to be reported as Mineral Resource or Ore Reserves in accordance with the JORC Code.	Orezone cautions that the NI 43-101 Mineral Resources and Mineral Reserves for the Casa Berardi Mine are not reported in accordance with the JORC Code 2012. A Competent Person has not yet completed sufficient work to classify the NI 43-101 Mineral Resources as JORC Code Mineral Resources or to classify the NI 43-101 Mineral Reserves as JORC Code Ore Reserves in accordance with the JORC Code 2012. It is uncertain that following evaluation and/or further exploration work that the NI 43-101 Mineral Resources or NI 43-101 Mineral Reserves will be able to be reported as Mineral Resource or Ore Reserves in accordance with the JORC Code. Nothing has come to the attention of Orezone that causes it to question the accuracy or reliability of 's estimates of NI 43-101 Mineral Resources and Mineral Reserves, but Orezone has not independently validated those estimates.

Foreign Estimate (ASX Listing 5.12) Annexure B

Additional Technical Information Relating to the Foreign Estimate		
Rule	**Explanation**	**Commentary**
5.12.10	A statement by a named competent person or persons that the information in the market announcement provided under rules 5.12.2 to 5.12.7 is an accurate representation of the available data and studies for the material mining project. The statement must include the information referred to in rule 5.22(b) and (c).	In accordance with ASX Listing Rule 5.12, the information in this presentation relating to the NI 43-101 Mineral Resource Estimate for the Casa Berardi Mine is confirmed as an accurate representation of the available data for the project by RESPEC. Michael S. Lindholm, C.P.G., an employee of RESPEC and who is one of the authors for the NI 43-101 report, is a member of the American Institute of Professional Geologists (AIPG) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person, as defined in the JORC Code. Mr. Lindholm has over 30 years' experience and is a full-time employee as Principal Geologist for RESPEC. Mr. Lindholm and RESPEC consent to the inclusion in this presentation of the matters based on this information in the form and context in which they appear.

Production Target (ASX Listing 5.16) Annexure C

Additional Technical Information Relating to the Foreign Estimate	
Rule	**Commentary**
5.16.1	All material assumptions underpinning the production target are contained in the Casa Berardi Technical Report and the IPO ASX. Please also see 5.12.5.
5.16.2	The estimated ore reserves underpinning the production target have been prepared by competent persons in accordance with the requirements of Appendix 5A (JORC Code). The information in this presentation provided under Listing Rules 5.16 that relates to the Casa Berardi gold mine production target is based on information compiled by Michael S. Lindholm. Mr. Lindholm is a member of the American Institute of Professional Geologists (AIPG) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person, as defined in the JORC Code. Mr. Lindholm is a full-time employee of RESPEC Company LLC. Mr. Lindholm consents to the inclusion in this presentation of the matters based on this information in the form and context in which they appear.
5.16.3	There are no inferred resources underpinning the production target. The Bomboré reserve estimate underpinning the production target has 11% proved and 89% probable reserves as further disclosed in the ASX Prospectus. The Casa Berardi reserve estimate underpinning the production target has 30% proved and 70% probable reserves as further disclosed in the Casa Berardi Technical Report.
5.16.4	No portion of the production target is based on inferred mineral resources.
5.16.5	Not portion of the production target is based on an exploration target.
5.16.6	No portion of the production target is based on inferred mineral resources.
